DTC - TELECOM

GPON Networks

GPON (Gigabit-Capable Passive Optical) Networks, are point-to-multipoint networks, delivering fast, reliable broadband services today.

GPON Networks, utilising fibre, are replacing traditional copper methods of delivering internet services.

By using a single fibre and splitting the bandwidth, you can supply upto 128 users (32 recommended to optimise bandwidth upto 80mbps) from a single inbound fibre.

Key Benefits Include:

- Lower cost
- Faster speeds
- Space saving benefits
- Flexible infrastructure capacity
- Fibre efficient
- Easier upgrade path
- More secure at physical infrastructure level
- Full API integration
- Agnostic management platform
- 24 hour x 7, 365 day remote network management and support

About DTC Telecom

DTC Telecom's three lines of business (**Reverse Logistics, After Market and Technical Network Services**) comprise nine key services that deliver a value proposition built around Telecom Lifecycle Management to the global telecom industry during a time of rapid change and migration to next generation networking technologies.

Our portfolio of services help clients maximise investment recovery from their surplus assets, reduce operating expenses and energy consumption through network consolidation, control Capex on installed legacy platforms, ensure corporate brand protection upon disposal, support wider environmental CSR policies and deliver safe compliant technical network services.

Key Network Technologies

- Fibre cabling
- OLT
- ONT/ONU
- Splitters
- Optical Distribution Frames
- Optical enclosures
- Pre-connectorised Solution

Key Brands

- Fibrain
- Dasan
- Halny
- Adtran
- CXR Networks
- Fujikura
- Commscope
- DataCom

We are an independent supplier not associated to any one manufacturer.
